Email: harshyadav160106@gmail.com

Mobile: +91-8307708561

SKILLS

Languages:	Java, C++, JavaScript, HTML, CSS
Frameworks:	Tailwind CSS, Bootstrap, Node.js, React.js
Tools & Platforms:	Git/GitHub
Database & Services:	MySQL, MongoDB, CI/CD, Docker, Linux, AWS
Core Subjects:	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Computer Networks, OS.
Soft Skills:	Problem-Solving, Team Player, Adaptability

PROJECTS

ShareVault – Secure Cloud File Sharing Platform: [GitHub](#) Jan '26 – Feb '26

- Built a full-stack cloud file sharing platform enabling users to upload files and generate secure shareable download links.
- Developed RESTful APIs using Node.js and Express for file upload, download, and authentication.
- Integrated AWS S3 for scalable cloud storage and efficient file retrieval.
- Designed a MySQL database schema to manage users, file metadata, shareable links, and expiration policies.
- Built a responsive React dashboard with JWT-based authentication for secure file management and access control.
- Tech Stack:** React.js, Node.js, Express.js, MySQL, AWS S3, JWT, Axios.

Astro Image Classifier – AI-Based Space Object Recognition: [GitHub](#) Nov '25 – Dec '25

- Built an AI-based image classifier to identify astronomical objects such as stars, galaxies, and nebulae from space images.
- Trained a Convolutional Neural Network (CNN) on publicly available astronomy datasets with image preprocessing.
- Implemented an end-to-end ML pipeline covering data loading, model training, evaluation, and inference.
- Developed a simple web interface to upload images and display real-time prediction results.
- Gained hands-on experience with computer vision workflows and deploying ML models for interactive use.
- Tech Stack:** Python, TensorFlow/PyTorch, CNN, OpenCV, Streamlit

ExpenseFlow – Personal Finance Tracker: [GitHub](#) Sep '25 – Oct '25

- Built a Java-based Expense Tracker to record income and expenses with category-wise and monthly summaries.
- Designed a relational database schema and integrated Java with MySQL using JDBC for data persistence.
- Implemented CRUD operations to add, update, delete, and retrieve financial transactions.
- Wrote SQL queries with aggregation to generate monthly expense and income reports.
- Applied Object-Oriented Programming principles to structure the application into modular components.
- Added basic input validation and error handling to ensure data consistency and reliability.
- Tech Stack:** Java, MySQL, JDBC, SQL

CERTIFICATES

AWS Architecture Foundation Course AWS 	Feb '26
Privacy and Security in Online Social Media Certification NPTEL 	May '25
Introduction to Hardware and Operating Systems IBM 	Dec '24
The Bits and Bytes of Computer Networking Google 	Nov '24

ACHIEVEMENTS

Solved 300+ LeetCode problems, maintained a 100+ day streak and ranked 1754 globally in contests.	Jan '26
Earned the LeetCode SQL50 badge for completing the 50 Days of SQL challenge.	Dec '25
Headed the Arm Wrestling Club as CEO, driving training programs, and managing club operations.	Jan '25
Led and executed club events, coordinating teams to deliver successful competitions and training sessions.	Sep '25

EDUCATION

Lovely Professional University <i>Bachelor of Technology in Computer Science and Engineering</i> CGPA: 6.87	Phagwara, Punjab Aug '23 – Present
Suraj School <i>Intermediate</i> Percentage: 70	Rewari, Haryana Apr '22 – Mar '23
Suraj School <i>Matriculation</i> Percentage: 72	Rewari, Haryana Apr '20 – Mar '21
